

Milestone 3 Feedback Summary Report

Fall 2018

Summary and plans

Team: 3 Date: 4/29/19

1. UI and Functionality Feedback (P1 functions only)

- Home Page
 - Add title that tells the users that our website is designed for SFSU students to lease.
 - Better names for Nav bar buttons.
 - Needs the about us tab
- Landlord Page
 - Change button title to “Add Post” and make it more visible
 - For landlord
 - Add home Nav bar at top of the page
- Landlord Messages Page
 - Make title more clear
 - Change the view messages layout to a table
 - Add a “Go Back” button to go back to landlord page
- Post Page
 - Change title of page to “Post”
 - Add Note letting user know it will take time to get post approved
 - Put description section all the way at the bottom of page
 - Add a “address” input section
 - Change the size of the input sections for “Number of bedrooms”, “Number of bathrooms” and “Price” because it is way too long.
 - Change the size of “Submit and Cancel” buttons and put them next to each other

- Filtering
 - Has to many functionalities. Change and make it simpler.
- Search details and Maps
- UI Responsiveness (resize the browser)
- Performance (e.g. display of result list)

2. Feedback on Coding Style, Github, Database etc.

- Commit messages are not clear enough.
- Need more comments and headers to make code easier to read
- Frameworks correctly deployed
- Database is empty on server side
 - Need to give access to CTO Anthony to DB

3. Feedback on Project Status

- Coding Practices
 - Using consistent and descriptive variable names
- Software Engineering code management practices
 - All work is first pushed to development branch and everything must be working and reviewed by github master before it can be merged to master branch
- Website Security
 - Passwords are hashed

4. List of committed P1 functions (agreed upon at the review meeting)

- Login and Registration
 - Passwords stored and hashed.
- Search with Results
- Description of the place
- Messaging only one way (SFSU student message to landlord)
- Landlord Dashboard
 - Can view messages and Posts

5. Action items (plans based on feedback above)

- Front-end team will get together and finish making all the UI changes told by Professor at the meeting and get all pages ready for Back-end functionality
- Back-end team will get together and will connect Front-end pages and will set up all the Back-end functionalities for all the Priority1 functions
